SOFTWARE ENGINEER

Full Stack Developer with experience using frontend and backend technologies such as JavaScript, TypeScript, Node.js, React, Next.js, Ruby on Rails. Former lead Implementation Consultant and General Manager in the hospitality industry, focusing on creative problem-solving and innovation. Leveraged innovation and collaboration to execute complex projects leading to an increase in revenue, customer retention, and efficiency. Passionate about learning new things and staying current with existing technologies.

TECHNICAL SKILLS

JavaScript, React, Next.js, Node.js, Ruby on Rails, SQL, CSS, HTML

TECHNICAL PROJECTS

Space Invaders - [Github](#) | [Demo](#)

A Space Invaders clone.

- Fully functional Space Invaders game.
- Using OOP in JavaScript
- Covering HTML and CSS fundamentals
- Utilized HTML CANVAS for sprite dimensions, movement, and collision detection.

GetItDone - [Github](#) | [Demo](#)

A bespoke task management application.

- Users can add and group tasks.
- Users can add notifications to tasks and will be sent an alert at the time the user specifies.
- Features user authentication by email and password; users sent email on account creation.
- Features a Material UI frontend and Ruby on Rails backend.

RollCall - [Github](#) | [Demo](#)

A social media site similar in function to BeReal with added location services (Google Maps)

- Uses Google Maps API to allow users to add a location to their photos and display them on a Google map along with other users.
- Utilized active storage to allow users to upload their own files.
- Notification feature to call upon users to upload a photo to their group.
